Styling: UI UX, Figma, XD, Invision, CSS, Sass, Jss, Vuetify, Atomic Design, BEM, PrimeVue, Tailwind, Bootstrap, MaterialUI, ShadcnUI
Backend, DevOps: Laravel, GraphQL, Apollo, Restful Api, Socket.io, Docker, Firebase, Supabase
Architecture: SOLID, Design Patterns,SPA, SSR, SSG

Experiences

Aksoftware (Germany-Remote)— *FRONT-END / FULL-STACK Developer ... June 2024 - February 2026*

- Designed, architected, and extended over **10 custom web platforms** featuring dedicated admin panels and fully tailored *theming* systems — including key projects such as Moonhub, Orderion, Catering, meetmehalfway— enabling scalable client-specific customization and long-term maintainability.
- Optimized frontend validation logic and UX flows, reducing form submission errors by **40%** and improving interaction reliability.
- Front-end redesign initiatives, which enhanced usability and navigation clarity, resulted in a **15%** improvement in UX score and a **7%** increase in conversion rate.

ArcadianAI (Canada-Remote)—*Senior FRONT-END Developer..... April 2023- May 2024*

- Governed frontend development for enterprise platforms with live streaming, recording, and role-based access control, integrating **AI-powered chat** and intelligent comment analysis with ChatGPT Tokens to enhance customer satisfaction by approximately **40%.**
- Executed a major UI and performance overhaul (Abricam),reducing average page load time by 3
- Strengthened application stability by cutting frontend-related errors and troubleshooting by **+30%** through the creation of an **SDK** for all requested and using **E2E** and unit testing

Tikka Tehran, Iran— *Senior FRONT-END Developer(freelance)..... July 2022 - February 2023*

- Directed a mobile-first redesign of a large-scale language learning platform serving +**100,000** active users
- Pioneered advanced **A/B testing and SEO** with W3C standardinitiatives across key pages, improving keyword visibility and conversion funnels, reaching first-page Google rankings for critical keywords, and driving a **30% increase** in organic user growth within 5 months.

Kelidiha (Iran)—*FRONT-END Developer/TEAM LEAD(freelance)…….…….…….* *February 2019– July 2022*

- Established a comprehensive online academy ecosystem over 2 years, delivering video-based learning, live streaming courses with WebRTC, group sessions, chat, exams, and advanced test-book creation/editing features across a website, landing pages, applications, and 5 role-based management panels.
- Guided 4 team members, supporting delivery alignment and strengthening collaborative development workflows.
- integrating GraphQL with Apollo Client, reducing overall data-fetch latency by **53%** through optimized queries and client-side caching.

Jaan, Tehran, Iran — *FRONT-END Developer/TEAM LEAD(freelance)…….…….…….* *February 2020 – July 2022*

- Spearheaded development of a meditation and wellness platform serving **+100K** users, delivering a two-phase **PWA**, Android, and IOS release with full redesign and feature expansion while enabling real-time practice streaming and interactive breathing experiences.
- Mentored and guided a team of 3 developers, improving user retention through optimized flows and performance enhancements

Hamdmade Ltd., , Iran — *FRONT-END Developer…….…….…….* *March 2018– January 2022*

- Crafted many PWA applications and panels in almost 2 years with Vue and React Like online tennis court reservations, enabling real-time booking with a clean Material Design interface

Experiences

MyJobAI (Germany)

- Architected an AI-driven job matching pipeline, cutting sign-up-to-first-application time from 10 to under 2 minutes.
- Orchestrated multi-user coach workflows for candidate management, achieving a **90% UAT** success rate while leveraging Grafana and Hotjar analytics to identify bottlenecks, optimize performance, and improve user experience.
- Built a scalable full-stack platform with Next.js, Prisma, Postgres, and Supabase, optimizing performance and maintainability.

LearningPilot (Germany)

- Engineered an AI-powered full-stack high-performance platform using Next.js to generate digital courses from PDF and PowerPoint files with an online AI editor.
- Designed a SCORM-like modular workflow, driving **20% user growth** within two months

Ash Logistics Platform (China)

- Designed and deployed a scalable, performance-optimized real-time cargo tracking solution with messaging and financial confirmation workflows, ensuring low latency and operational reliability across web, admin, and WeChat Mini Program for cross-platform logistics.

Education
